

MONDAY 2 NOVEMBER, LONDON

Iliad Intensive

London, 2 to 27 November 2026

EVERY DAY

The daily rhythm

10:00	Lecture starts
12:30	Lunch
17:40	Feedback form
18:00	Dinner

Please be on time. We are many people.

WHO IS TALKING

Leonard Bereska

- Teaching and delivery lead at Iliad
- Physics, then PhD in AI safety (mech interp)
- June participant · ran September and October
- leonard@iliad.ac · **@leonardbereska** on Discord

Iliad

- **Builds the field:** conference, journal
- **Incubates** research organisations
- **Trains** researchers: Intensive, Fellowship

THE MONTH

Twenty days

MON 2 Intro to ML engineering and transformers	TUE 3 Alignment introduction	WED 4 RL and misgeneralization	THU 5 Agent foundations	FRI 6 Alignment in practice
MON 9 Debate and scalable oversight	TUE 10 Solomonoff induction and AIXI	WED 11 Heuristic arguments and verification	THU 12 Multi-agent dynamics	FRI 13 Steganography and backdoors
MON 16 ZKP for compute governance	TUE 17 Proposal day one	WED 18 Physics for deep learning	THU 19 Mysteries of deep learning	FRI 20 Training dynamics
MON 23 Singular learning theory	TUE 24 Data attribution	WED 25 Computational mechanics	THU 26 World models	FRI 27 Proposal day two, and launch

EVERY DAY, 17:40

The feedback form

Site → **Feedback** → pick your name.

Everyone, every day, before you leave.

OPEN NOW

intensive-november
.pages.dev/feedback

WHERE THINGS LIVE

One site, one channel

intensive-november.pages.dev	Schedule, materials, feedback
#intensive-november	Announcements, questions
#intensive-errata	Mistakes in materials

WHO TO ASK

The team

Leonard Bereska	Teaching
Aron Mill	Building, access, food, reimbursements
Lee Wright	Operations
David Udell	The Fellowship · remote

TWO DAYS IN THE MONTH

Proposal days

Tue 17 November	days 1 to 11	in groups of up to three
Fri 27 November	days 13 to 19	alone, with the launch

- Scope: three months of research
- An expert on each topic in the room

TUE 17 · DAYS 1 TO 11

Proposal day one

MON 2 Intro to ML engineering and transformers	TUE 3 Alignment introduction	WED 4 RL and misgeneralization	THU 5 · AREA **Agent foundations**	FRI 6 Alignment in practice
MON 9 · AREA **Debate and scalable oversight**	TUE 10 · AREA **Solomonoff induction and AIXI**	WED 11 · AREA **Heuristic arguments and verification**	THU 12 · AREA **Multi-agent dynamics**	FRI 13 · AREA **Steganography and backdoors**
MON 16 · AREA **ZKP for compute governance**	TUE 17 **Proposal day one**	WED 18 Physics for deep learning	THU 19 Mysteries of deep learning	FRI 20 Training dynamics
MON 23 Singular learning theory	TUE 24 Data attribution	WED 25 Computational mechanics	THU 26 World models	FRI 27 Proposal day two, and launch

FRI 27 · DAYS 13 TO 19

Proposal day two

MON 2 Intro to ML engineering and transformers	TUE 3 Alignment introduction	WED 4 RL and misgeneralization	THU 5 Agent foundations	FRI 6 Alignment in practice
MON 9 Debate and scalable oversight	TUE 10 Solomonoff induction and AIXI	WED 11 Heuristic arguments and verification	THU 12 Multi-agent dynamics	FRI 13 Steganography and backdoors
MON 16 ZKP for compute governance	TUE 17 Proposal day one	WED 18 · AREA **Physics for deep learning**	THU 19 · AREA **Mysteries of deep learning**	FRI 20 · AREA **Training dynamics**
MON 23 · AREA **Singular learning theory**	TUE 24 · AREA **Data attribution**	WED 25 · AREA **Computational mechanics**	THU 26 · AREA **World models**	FRI 27 **Proposal day two, and launch**

Why write a proposal

- Helps digest the days
- First step to your own research

How selection works

- Application, proposals, your reviews, teachers' impressions
- Not fool-proof: if we miss you, apply again

ASKS

Four things

- Feedback form, every day
- Ask questions, talk to the teachers
- Be direct
- Be kind

UNTIL 11:00

Meet each other

Round 1

What did you leave to be here?

Five minutes · someone you have not met

Round 2

What are you most looking forward to?

New person · five minutes

Round 3

Something you know well enough to teach the rest of us.

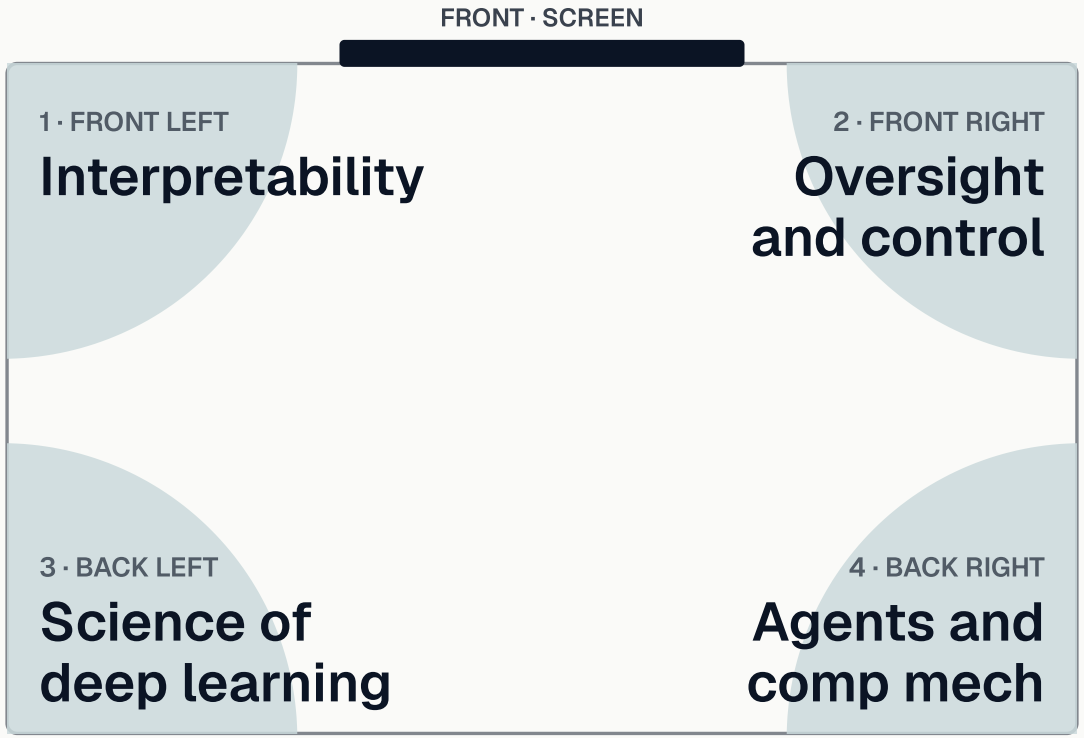

New person, from a different background than yours

Round 4

What would make this month a success for you?

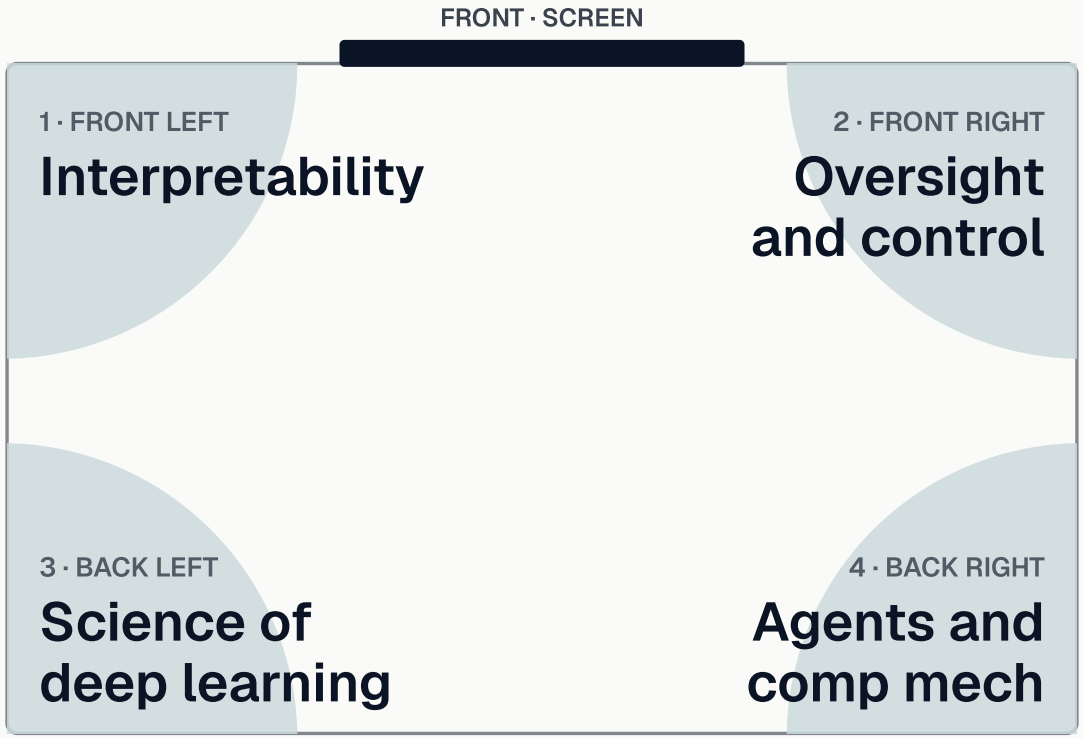

New person · five minutes

The area you know best

Go to the corner of the area **you know best.**

The area you want to learn

Go to the corner of the area **you want to learn.**

11:00

Coffee

11:15 · ML engineering and transformers with Dan Wilhelm · 12:30 lunch
